How to Interpret the Quilt Summary

This chart compares the ranking of all 42 Community Areas (CAs) on each of 33 key indicators. The 33 indicators have been selected from amongst the 100 statistics presented in the main area profiles. They represent aspects of the quality of life in the local area that can potentially be influenced and improved by the Council's and its partners' actions.

In the chart the indicators appear as column headings. The names (and codes) for the 42 Community Areas (CAs) in Derbyshire appear as row headings in the chart.

Ranks range from 1 to 42; the worst area on a particular indicator is ranked one, the best is ranked 42. Colour is used to summarise the ranking with red for 'worst' CAs and green for 'best'. Orange, then yellow, then pale green are used for the intervening ranks. By looking along a row, for a particular CA, it's possible to get a rough indication of the area's potential problems and potential strengths. However, it should be noted that the chart provides a ranking only and does not indicate the range of values for a particular indicator.

Precise definitions (highlighted in grey) of the 33 indicators appear in the User Guide.
