Dear Mr Claridge

**PROPOSED ENERGY GENERATION PLANT ON LAND AT PYE BRIDGE INDUSTRIAL ESTATE, SOMERCOTES, ALFRETON, DERBYSHIRE – WARWICK INTEGRATED GENERATION LIMITED**

With reference to the above, and further to our recent telephone conversations, we are now writing to satisfy your requirements in respect of the recently submitted planning application. In this regard, we comment as follows:

1. Given a requirement to extend the 'red line boundary' relating to the planning application so as to incorporate the access road through the Pye Bridge Industrial Estate and with this connecting into the public highway, we are now submitting a revised drawing reference no. HG1195:01/1A which confirms matters.
2. In light of the above, we are submitting a duly completed and signed Certificate C and, in this respect, we should be grateful if this could replace Certificate A previously submitted. We are also forwarding to you a copy of the requisite newspaper advertisement.
3. Finally, with regard to trip generation associated with the importation of the briquetted fibre fuel from the neighbouring Derwent Waste site, I would refer you to the revised Transport Statement produced by Northern Transport Planning Limited on behalf of the applicant company, and in particular section 2.11. We trust this clarifies matters for you.

In light of the above, we should be grateful to receive confirmation that the application, in its amended form, is now valid and can be processed accordingly. If, however, you wish to discuss matters or require any further information, please do not hesitate to contact us.

Yours sincerely  
for Signet Planning

**IAN ROWE**
