I do have concerns about the level of disruption to residents, including noise and air pollution from the activity over five years, which is a considerable length of time.

I am also concerned about traffic management on the roads concerned, the movement of HGV's, and how that will impact upon residents and the local traffic needs, also the needs of the local economy.

I am concerned about the impact upon the environment whilst the work is being carried out and also in the longer term if habitat, landscape and vegetation is disrupted and if there is geological disturbance.

The proposed site is very close to residential properties, of some vulnerability, and for that reason alone I do not feel it to be a suitable site for the proposed activity.

Regards
Diane Charles
