

## What is this consultation about?

Following the significant national floods in 2007, the Government gave local authorities new powers and responsibilities to coordinate the management of local flood risk sources (surface water, groundwater and ordinary watercourses).

To fulfil its duties under the Flood and Water Management Act (2010) the County Council has completed a draft Local Flood Risk Management Strategy for Derbyshire.

The draft Local Flood Risk Management Strategy for Derbyshire documents how it is intended that flooding will be strategically managed by the County. Its main purpose is to identify ways in which the Council can help to minimise the damage from flooding and support those who are affected.

Part 1 of Derbyshire's Local Flood Risk Management Strategy has been designed to provide you with general information about flooding and flood risk, who to call and how you can help yourself become more resilient to the impacts of flooding.

Part 2 of the Derbyshire's Local Flood Risk Management Strategy focuses on the more technical details for understanding flood risk in Derbyshire, our action plan for how we intend to coordinate the management of the future risks and how we can fund our flood risk management functions and initiatives.

There are also a number of Guidance Notes that support the information within Derbyshire's Local Flood Risk Management Strategy.

We want to hear your views about the proposed Local Flood Risk Management Strategy for Derbyshire. This consultation is an opportunity for you to have your say and will run from Monday 16 February 2015 and close on Monday 16 March 2015.

If you have any queries or need help in taking part in the consultation please contact Victoria Raiment on 01629 535487 or email [victoria.raiment@derbyshire.gov.uk](mailto:victoria.raiment@derbyshire.gov.uk) and a member of the Stakeholder Engagement and Consultation Team will get back to you within two working days.
