Note 1: Purchased Services are defined as 'Agreements for provision of services, primarily residential and nursing care, day care, home care, direct payments and other community services, for individuals by providers, both in-house and independent sector'

The projected year end overspend of £9.858m is after the one-off use of departmental reserves totalling £2.6m and income from the PCT of £1m. These changes are for 2013/14 only and the underlying overspend position going into 2014/15 remains at £14m. This will be further compounded by the new Extra Care and residential centres opening within the next year which are showing an underlying overspend of £6m.

The overspend is due to the impact of demographic pressures and the increasing complexity of clients' needs.

At the start of the year Adult Care had 12,238 clients with a purchased service. This is projected to increase to 13,018 by the end of the year. Based on average personal budgets for new clients up to period 9, this will result in an additional projected cost of £5m. For clients already in receipt of a service, reviews on increased complexity of needs results in an average increase of £70 per week. Based on review activity up to period 9 the projected extra cost will be around £8m. This projected total of £13m is seen within the purchased services line on the above total.

The Adult Care budget remains under pressure from increased demand and proposals have been put forward to reduce spending for future years. The savings target for 2013/14 is £9.017m. Actions to reduce spending by £5.730m were approved by cabinet on 29th January 2013. To date £5.679m of these approved savings have been achieved and it is expected that all identified approved savings will be achieved by the end of the financial year.
