

# **Derbyshire County Council**

## **Forward Works Programme for Highways**

### **Maintenance Asset Management Plan (AMP)**

#### **2016/2021**

This programme has been drawn together from a series of Condition and Treatment Surveys of the Highway Network undertaken between June and September 2015.

It recommends treatments based on a preventative approach to highways maintenance, and where, possible looks to build greater resilience into the network for future years.

It has been based on sound asset management principles and provides a baseline for future lifecycle planning. This will assist in identifying likely treatments and budgetary requirements for the next Asset Management Plan (AMP) 2021/2026.

The recommendations are based on the current survey network and, as a consequence:

- Highways listed on the current survey network and held in the United Kingdom Pavement Management System (UKPMS), should all be metalled – there are a number of highways that are included in the UKPMS that need to be removed as they no longer require to be metalled. This work is currently in progress, however, for the purposes of this Forward Works Programme, these will be reviewed when the annual Highways Maintenance Service Plans are drawn up as part of the Local Transport Programme.
- A number of highways were not surveyed during the Condition and Treatment Surveys undertaken between June and September 2015 as a consequence of road closures or roadworks. These highways have been identified and will be surveyed in 2016.

The Forward Works Programme for Highways Maintenance is a list of all treatment schemes proposed in the AMP 2016/2021 and has been set out in sections;

- Patching
- Surface Dress (5% patching)
- Surface Dress (10% patching)
- Resurface or Surface Dress (20% patching)
- Resurface or Surface Dress (>20% patching)
- Resurface
- Surface Dress AMP 2021/2026

... and roads have been listed by their classification and then alphabetically in each of these sections.

The actual prioritisation of these schemes will be determined annually by available budget, condition and risk, and be the basis of the annual Highways Maintenance Service Plan.

November 2015

## Patching Recommended U Class Roads

U4427/105	Abbotts Close, Newhall	Patch	U
U0362/105	Abel Lane, Upper Town	Patch	U
