

**SCHOOLS FORUM****19<sup>th</sup> June 2019****Report of the Executive Director for Children's Services****High Needs Provision – Notional SEN budgets & SEN Contingency funding**

1. **Purpose of the Report** - This report asks the Forum to consider:
  - (i) updating the LA's notional SEN budget calculations; and
  - (ii) whether or not to adopt revised calculations to determine school & academies' eligibility for support from the SEN contingency fund.

2. **Information and Analysis**

- 2.1 **Notional SEN budgets – The national position**

In 2013-14 the greater standardisation of local authorities' funding formulae for mainstream schools resulted in the introduction of a requirement for local authorities to delegate sufficient funding to meet the costs of SEN support up to £6,000 per pupil, per annum. In recognition of that expectation, both local funding formulae and the new schools national funding formula include factors relevant to additional needs, which act as proxies for a school's cohort of pupils who need extra support, including those with SEN. The additional needs factors in the national funding formula give schools about £6 billion nationally. This is intended to ensure mainstream schools have the resources they require as part of their core budgets.

Despite the advent of the introduction of the national funding formula for mainstream schools, the DfE have continued to allow local authorities flexibility on how local notional SEN budgets should be calculated. Questions 6 to 8 of the DfE's SEND Call for Evidence seeks views on the merits of a notional SEN budget, including whether a national calculation should be adopted.

- 2.2 **Notional SEN budgets – The position in Derbyshire**

The requirement to publish a notional SEN figure came around the same time as LAs were required to simplify their LMS formulae. In Derbyshire the notional SEN quantum was based on the SEN related elements of the 2012-13 formula, with regression/correlation techniques used to find the "best fit" to the 2013-14 formula indicators i.e. pupil numbers, a fixed amount per school (lump sum element), deprivation, EAL and low cost high incidence (LCHI) AEN, now referred to as Low Prior attainment (LPA).

As a result of the above modelling the following current percentages were derived:

**Table 1 – Current Derbyshire notional SEN percentages**

	AWPU	Deprivation	LCHI/LPA	EAL	Lump sum
Primary	6.75%	100.00%	100.00%	100.00%	6.00%
Secondary	0.75%	100.00%	100.00%	100.00%	20.75%

From April 2018, allocations to schools in Derbyshire have mirrored, as far as funding would allow, the National Funding Formula (NFF). The DfE's NFF itself does not have a notional SEN proportion for each factor, although the requirement to publish notional SEN figures remains in place for LAs.

Derbyshire is probably not alone in being in the odd position of publishing a notional SEN figure which is based on the percentages derived from an historic LA formula but applied to an entirely different NFF. This quirk potentially matters.

Mainstream schools and academies are responsible for meeting the first £6,000 of additional educational needs support for each child. The notional SEN budget is intended to assure schools that they have the resources to meet such costs. Schools which are able to demonstrate that their SEN burden is unreasonable could be eligible for support from the SEN contingency held within the high needs block.

The notional SEN percentages for shire LAs for both sectors for 2018-19, based on published DfE data, are provided in Appendices 1 and 2. Based on the summary data the following proposals for the calculation of notional SEN allocations for 2020-21 onwards in Derbyshire are as follows:

**Table 2 – Current and proposed Derbyshire notional SEN percentages**

Sector/Indicator	Current %	Proposed %	Basis on which future years' notional SEN budgets would be calculated
Primary - KS1&2 AWPU	6.75%	3.25%	Shire averages ex DCC
Secondary – KS3&4 AWPU	0.75%	3.21%	Shire averages ex DCC, averaged across both Key Stages
Both - Deprivation – current FSM	0.00%	0.00%	Unchanged, funding is for a free meal
Both - Deprivation – Ever 6 FSM	100.00%	50.00%	Percentages aligned with IDACI
Both - Deprivation – IDACI	100.00%	50.00%	Percentage in line with shire average
Both - English as an Additional Language	100.00%	0.00%	Funding to help address language barriers rather than AEN needs
Both - Low Prior Attainment	100.00%	100.00%	No change
Primary - Lump Sum	6.00%	2.24%	Shire average. N.B. most (18 of 27) shire LAs do not include
Secondary - Lump Sum	20.75%	1.96%	

Comparing the above proposed percentages with those currently used gives the following results.

**Table 3 – Comparison of current and proposed notional SEN percentages**

	Primary Derbyshire formula				Secondary Derbyshire formula		
	2017-18	2019-20	2019-20		2017-18	2019-20	2019-20
	Local	NFF	NFF		Local	NFF	NFF
	Published	Published	Proposed		Published	Published	Proposed
Notional SEN budgets:	£m	£m	£m		£m	£m	£m
AWPU	10.604	11.036	5.313		1.127	1.164	4.980
Deprivation	16.925	14.073	7.036		16.081	13.345	6.673
Additional AEN	1.053	15.208	15.208		8.184	12.061	12.061
EAL	0.146	0.536	0.000		0.015	0.184	0.000
Lump sum	2.764	2.310	0.862		1.428	1.027	0.097
Total	31.492	43.163	28.419		26.835	27.781	23.811
Schls Block excl. rates	225.538	236.779	236.779		185.791	194.239	194.239
Overall notional SEN %	<b>13.96%</b>	<b>18.23%</b>	<b>12.00%</b>		<b>14.44%</b>	<b>14.30%</b>	<b>12.26%</b>

2017-18 has been used as the comparator as this was the last year that the Authority's own funding formula was applied and is the formula to which the current percentages truly relate. The overall impact of the changes is a modest reduction in the level of resources identified as being notional SEN funding.

At individual school level, the average notional SEN budget for a small primary schools with 60 on roll would reduce from £41,478 to £26,510). The average notional SEN allocation for a primary school with 210 on roll reduces from £144,512 to £95,580.

A small secondary school with ~430 on roll would see its notional SEN percentage for 2019-20 reduce marginally from £309,597 to £280,101. The reduction is again largely due to a reduction in the level of deprivation attributed as SEN related. A large secondary school with ~1,000 on roll would see its notional SEN percentage for 2019-20 reduce marginally from £606,356 to £557,560. The reduction is again largely due to a reduced deprivation element.

The limitations of the proposed updated SEN calculations for both sectors are that they are based on notional percentages rather than being derived from empirical calculations. It is hoped that the DfE's Call for Evidence will result in a national notional SEN calculation. In the meantime a revised local notional SEN formula would provide a baseline against which eligibility for additional support might be considered from April 2020. This is discussed in the next section.

The Forum is asked to give its views on amending Derbyshire's notional SEN budgets to reflect the percentages in Table 2.

## **2.3 Potential use of notional SEN budgets to allocate the SEN Contingency**

The Authority holds a contingency of £0.350m within the High Needs Block to help those schools having difficulty in meeting the requirement to fund AEN costs. Prior to 2018-19 requests for support were assessed subjectively on a case by case basis. That process became increasingly time-consuming and resulted in long delays before final decisions were made. In order to ensure that schools were able to plan more effectively and receive any funding due earlier in the year, for

2018-19 and 2019-20 an objective formulaic approach was adopted to allocate most of this total, with a small amount held back for exceptional cases.

The current calculation looks at the number of children with an EHCP/GRIP allocation and expresses the count as a percentage of the NOR. Schools with more than 3% of such children qualify for support. Actual support is net of an assumed contribution from the school (equivalent to 1% of their annual budget) with the resultant allocations scaled back to keep within the resources available.

One shortcoming of the current formula is that no account is taken of the impact on schools' finances of those children with AEN but which do not qualify for GRIP/EHCP support. The key questions for the Forum are

- (i) should eligibility for support from the contingency include all children with additional educational needs, not just those in receipt of GRIP/EHCP funding?; and
- (ii) if the answer to (i) is yes, what per pupil cost should be assumed for children with AEN below the GRIP/EHCP threshold?

The annual school census records SEN in two ways. Children given an "E" marker are in receipt of top up funding via an EHCP or GRIP allocation. Children with a "K" marker are regarded as having AEN but do not receive top up funding

With regards to the first question, including children with lower level AEN would be logical and consistent with the original purpose of the notional SEN calculation. It would be reasonable to assume that the children marked with an "E" have cost the school an additional £6k, a necessary requirement to be eligible for EHCP/GRIP support. For children with a "K" marker a notional cost would be needed: for the purposes of modelling the following figures have been used:

	Per Pupil	Per Pupil	
Indicator	Primary	Secondary	Note
	£	£	
Low Prior Attainment	900.00	1,550.00	Planned multiplier in Derbyshire 2020-21
AWPU	89.28	132.39	Pri & KS3/4 avge multipliers x Table 2% <sup>s</sup>
Deprivation IDACI	156.06	225.82	50% of IDACI funding per pupil
Deprivation Ever 6	270.00	392.50	50% of NFF multiplier
Lump sum	14.47	129.61	(£110,000 x Table 2% <sup>s</sup> )/NOR
Total	1,429.81	2,430.32	
<b>Total (rounded)</b>	<b>1,430.00</b>	<b>2,430.00</b>	

On the October 2018 census 8,726 children in primary schools and 5,085 in secondary schools had an E or K marker. The mainstream national funding formula allocates money to schools, in part, on the basis of the number of children with low prior attainment. Primary school counts are based on the number of children assessed as not achieving a good level of development. Secondary schools' low prior attainment funding is based on the number of pupils not achieving the expected level at Key Stage 2 in one or more of reading or writing or mathematics.

The low prior attainment populations used in the national funding formula far exceed the numbers of children with an E or K flag on the annual census. The latest available figures used in the 2019-20 budget calculations being 20,297 (primary) and 7,781

(secondary.) It would seem reasonable that the calculation of a school's notional SEN spend should include a notional cost for each of these residual low prior attainment pupils. For the purposes of the modelling, cost figures of £300 (primary) and £450 (secondary) have been used. The outcome of the modelling is provided in Appendix 3.

There are four other points to consider. The first is the reliability of the census data, particularly for those children marked as "K". There is a risk that as these numbers could in future trigger additional funding, coupled with the fact that the data is not independently evidenced, this could lead to a rise in counts, notional spend and thus claims for additional support. However, on balance this risk is considered to be no greater than for the "good level of development" data set which drives low prior attainment funding calculations in the national funding formula.

Secondly, in the event that there were to be a surge in numbers, the basis for calculating support to schools would have to be reviewed i.e. allocations might have to be scaled and/or the model amended.

Thirdly, should the DfE's call for evidence result in a national notional SEN calculation, this would be brought back to Schools Forum for further consideration of the implications, including the impact on the SEN contingency.

Finally, it will be interesting to see if the call for evidence results in a change to the reporting requirements regarding notional SEN budgets. If more transparency over actual spending is required then this would inform future SEN contingency arrangements.

In the interim, the School Forum is asked to consider whether a model which incorporates the number of pupils with low prior attainment, as well as those qualifying for EHCP/GRIP funding, would be preferable to the current arrangements.

3. **Other Considerations** - In preparing this report, the relevance of the following factors has been considered: - prevention of crime & disorder, equality of opportunity, and environmental, health, social value, human rights, human resources, property and transport considerations.

4. **Background Papers** - Files held within Children's Services Finance.

5. **Officer's Recommendations**

5.1 The Schools Forum is asked to consider and agree the proposed revisions to the calculation of notional SEN budgets for 2020-21 as set out in section 2.2.

5.2 The School Forum is asked to consider whether or not the allocation of the SEN contingency in section 2.3 should incorporate the number of pupils with low prior attainment as well as those qualifying for EHCP/GRIP funding, in preference to the current arrangements.
