

# Natural Capital Strategy for Derbyshire

*Final report*

February 2023

Report prepared by:

Dr. Katie Medcalf

Dr. Gemma Bell

Elsa-Kristen Naumann

Jacqueline Parker

Dr. Louise Soanes

James Rugg

*Environment Systems Ltd.*

9 Cefn Llan Science Park

Aberystwyth

Ceredigion

Newton Chambers Road,

Sheffield S35 2PH

## Table of Contents

### Contents

Chapter 1: Introduction to Derbyshire's Natural Capital Strategy	10
Chapter 2: Natural Capital Baseline Assessment: Mapping for Nature Recovery	13
Introduction	13
Natural capital	13
Nature Recovery Network (NRN)	13
Local Nature Recovery Strategies	14
Creating a habitat map of Derbyshire	14
Choice of classification system for the habitat map	14
Creating the habitat map of Derbyshire	15
The habitat map of Derbyshire	17
Baseline ecological networks	19
<b>Habitat Condition</b>	24
Summary	24
Chapter 3: Spatial Distribution of Ecosystem Services, Risks and Opportunities	26
Ecosystem services	26
Factors that influence ecosystem services	27
Nature-based solutions	28
Irreplaceable habitats	29
Outputs and analysis: ecosystem services – stock, opportunity and risk	30
Agricultural production	30
Biodiversity and irreplaceable Habitats	38
Surface water regulation (Natural Flood Management)	58
Water quality regulation	66
Carbon storage and sequestration	70
Recreation	76
Tourism	84
Contribution of agriculture to landscape character	88
Chapter 4: The Natural Capital Accounts	95
Natural Capital Accounting	95
Scope of the account	97
Materiality assessment	99
Outputs	103
Asset Register	103
Physical and Monetary Flow Account	105

Derbyshire Natural Capital Strategy	
Natural Capital Asset Account	108
Breakdown of results within Derbyshire	109
Summary	109
Chapter 5: Natural Capital Baseline Assessment - landscape character	111
Baseline landscape character	111
The key characteristics of Derbyshire's landscape	111
The landscape character attributes	117
Using landscape character to inform decision making	117
Chapter 6: Cultural Historic Heritage	138
Chapter 7: Monitoring plan	140
Chapter 8: The impacts of climate change	142
Rainfall and temperature changes	142
Impacts on agricultural land quality	150
Chapter 9: Identification of further funding mechanisms	156
Biodiversity	156
Water quality	158
Flood risk	158
Carbon	158
Recreation and public health	159
Tourism	160
Natural Environment Investment Readiness Fund	160
Obtaining the most funding for land	160
Other websites which help find funding	161
Chapter 10: The Natural Capital Strategy: conclusions and recommendations	162
Conclusions	162
Recommendations	164
Implementation priorities for nature recovery	164
Keeping the Natural Capital Strategy up to date	166
Improving the Natural Capital Account	166
Communication of the Natural Capital Strategy:	167
List of appendices	168
Appendix 1 - UK Habitat Classification Habitat Definitions	168
Appendix 2 - Input datasets and conflation order used to produce the Habitat Asset Register	168
Appendix 3 - UKHab classes mapped in the Habitat Asset Register	168
Appendix 4 - Input datasets used in production of the ecosystem service stock, risk and opportunity maps	168

Appendix 5 - Methodology used in the production of individual SENCE and climate change maps	168
Appendix 6 – Natural Capital sub regional accounts	168
Appendix 7 – Natural Capital accounting methodology	168
Appendix 8 - Baseline landscape character	168
Appendix 9 – Tables of habitat priorities according to Landscape Character Type and National Character Area	168
Appendix 10 – Maps of habitat priorities according to Landscape Character Type and National Character Area – Derby City	168
Appendix 11 - Cultural historic features and their relationship to the natural capital assets and ecosystem services	168
Appendix 12 – Monitoring plan	168

Figure 1: Rationale for the Natural Capital Strategy for Derbyshire	11
Figure 2: Area covered by the Derbyshire Natural Capital Strategy, showing Local Administrative Districts	12
Figure 3: Merging data to create the habitat map	16
Figure 4: Extract of habitat map showing hedgerow and woodland classes	17
Figure 5: Habitat map showing Level 1 classification	18
Figure 6: Woodland network	20
Figure 7: Heath network	21
Figure 8: Wetland network	22
Figure 9: Natural grassland network	23
Figure 10: Identification of living systems, their management and the flow of ecosystem service for detention time of overland flow	28
Figure 11: Agricultural Land Classification	32
Figure 12: Agricultural production: current provision (stock)	33
Figure 13: Risks to agricultural production: potential conflicts with woodland objectives	34
Figure 14: Risks to agricultural production: ground-mounted solar PV	35
Figure 15: Risks to agricultural production: small wind generation	36
Figure 16: Risks to agricultural production: large wind generation	37
Figure 17: Biodiversity: current provision (stock)	40
Figure 18: Biodiversity hotspots / coldspots	41
Figure 19: Opportunities for establishing species-rich grassland	42
Figure 20: Opportunities for establishing species-rich grassland in relation to Natural England national grassland NRNs	43
Figure 21: Opportunities for establishing heath	44
Figure 22: Opportunities for establishing heath in relation to Natural England national heathland NRNs	45
Figure 23: Opportunities for establishing wetland	46
Figure 24: Opportunities for establishing wetland in relation to Natural England national wetland NRNs	47
Figure 25: Opportunities for establishing woodland	48
Figure 26: Opportunities for establishing woodland in relation to Natural England national woodland NRNs	49
Figure 27: Risks to biodiversity	51
Figure 28: Distribution of irreplaceable habitats	52
Figure 29: Process Diagram for Dealing with Irreplaceable Habitats in Development Planning and BNG Projects	53
Figure 30: Natural Flood Management: current provision (stock)	60
Figure 31: Hydrological catchment zones	61
Figure 32: Channel Network	62
Figure 33: Hydrological connectivity	63
Figure 34: Natural Flood Management: all NFM opportunities	64
Figure 35: Natural Flood Management: targeted opportunities	65
