Developable dwellings:

Summary

The site consists of brownfield and greenfield land. There are existing dwellings on the site and the site contains a large amount of woodland. The site is located to the north of Formark. The site has potential access onto Chestnut Avenue, Foremark. It has been proposed through the SHLAA submission that approximately 70 dwellings could be provided on this site. There is no developer interest on the site

The site is considered to be potentially suitable as it is currently restricted by local planning policy as the site is in an area protected by countryside policy.

The site is considered available as the majority of the existing use would not need to be relocated depending on the scale of the development and the site is in one ownership.

The site is considered achievable as there is a reasonable prospect that the site will be financially viable for residential development in the future. However the existing buildings and woodland may impact on viability.
