**Summary**

The site is a green field site that is currently in use as agricultural land which is located to the north of Mickleover. The site has potential access onto Radbourne Lane. We have estimated a site capacity of 610 dwellings. There is no developer interest on the site.

The site is considered to be potentially suitable as it is currently restricted by local planning policy as the site is in an area protected by countryside policy.

The site is considered not available as, based on the information from the developers, the site is no longer being actively promoted. If it were to be promoted again then the existing use would not need to be relocated and the site is in one ownership.

The site is considered achievable as it is a green field site and there is a reasonable prospect that the site will be financially viable for residential development in the future.
