Summary

The site currently contains a range of agricultural buildings. The site is located to the north of Scropton. The site has potential access onto Scropton Road. We have estimated a site capacity of 12 dwellings. There is no developer interest on the site.

The site is considered to be potentially suitable as it is currently restricted by local planning policy as the site is in an area protected by countryside policy. The whole of the site lies within Flood Zone 3a and therefore a sequential test would be required.

The site is considered available as the site is in one ownership.

The site is considered achievable as there is a reasonable prospect that the site will be financially viable for residential development in the future.
