Dwelling delivery timescales (number of dwellings per year block):	1-5	6-10	11-15	16+	CAPACITY
	0	16	0	0	16

Site suitable? Yes

Site available? Yes

Site achievable? No

Deliverable dwellings: 0

Developable dwellings: 16

Summary

The site is currently vacant and includes some land next to the petrol station on Harvey Road. It was previously a builders yard and is brownfield in nature. Due to the former use there is the possibility of contamination on the site.

There is good access to schools and services in the Osmaston Park Road area and there are bus routes within walking distance of the site that would allow access to the city centre. The site is located next to the outer ring road so general access to the road system is good. Access to Allenton District Centre with a wide range of local facilities is very good as is access to public transport routes into the City Centre and out of the city to the south. There is a recent planning permission for a new Tesco store close to the site.

It is classed as suitable and is in a very good location for residential development. It has capacity to deliver about 16 dwellings. Although not deliverable at the moment it is expected to be developed within 10 years. There has been recent developer interest.
