**Summary**

The site is a green field site currently used as agricultural land and dwelling which is located to the west of Shardlow. The site has potential access onto London Road. We have estimated a site capacity of 22 dwellings. There is no developer interest on the site.

The site is considered to be potentially suitable although it is currently restricted by countryside and green belt policy. The site lies wholly within Flood Zone 3a and therefore a sequential test would be required.

The site is considered available as the site is in one ownership. Further information is needed on the intentions for the existing farm house on the site.

The site is considered achievable as it is a green field site and there is a reasonable prospect that the site will be financially viable for residential development in the future. However, the impact on viability of removing the existing buildings would need further assessment.
