**Summary**

The site is a green field site that is currently used as agricultural land that is located to the north of Aston on Trent. The site has potential access onto Derby Road though it is between two existing dwellings. We have estimated a site capacity of 44 dwellings. There is high developer interest on the site.

The site is considered to be potentially suitable as it is currently restricted by local planning policy as the site is in an area protected by countryside policy. The site also borders a green belt area.

The site is considered available as the existing use would not need to be relocated and the site is in one ownership.

The site is considered achievable as it is a green field site and there is a reasonable prospect that the site will be financially viable for residential development in the future. However, the impact on viability of the creation of an access would require further assessment.
