CONSTRAINTS				
Policy constraints: The site has been considered against Local, Regional and National planning policy and it has been assessed that the site is constrained by: - Countryside policy (EV1) in the South Derbyshire Local Plan 1998 and is within a conservation area.				
Physical constraints (i.e. topography): The site has been assessed and it is considered that the site is physically constrained by the land rising to the west and south. There are also telegraph poles running across the site, which may need to be rerouted.				
Environmental constraints including flood risk: The site has been assessed and it is considered that the site is not environmentally constrained. This assessment included consideration of flood risk.				
Access constraints: The site has been assessed and it is considered that the access to the site is not constrained.				

Ownership constraints:

From the information available to us it is considered that the site is currently in one ownership.

Other:

The site has been assessed and it is considered that there are no further constraints.

Summary

The site is a green field site that is currently used as agricultural land. The site is located to the south of Stanton by Bridge. The site has potential access onto Church Close. The site rises to the south and west. We have estimated a site capacity of 46 dwellings. There is no developer interest on the site.

The site is considered to be potentially suitable as it is currently restricted by local planning policy as the site is in an area protected by countryside policy.

The site is considered available as the existing use would not need to be relocated and the site is in one ownership.

The site is considered achievable as it is a green field site and there is a reasonable prospect that the site will be financially viable for residential development in the future. However, further assessment of the impact of the gradient constraint on viability would be required.
