**Summary**

The site is greenfield and currently used as agricultural land. The site has potential access onto Etwall Road. It has been suggested through the SHLAA submission that the site could accommodate 75 dwellings. There is a medium level of developer interest in the site.

The site is considered to be potentially suitable as it is currently restricted by Countryside policy in the adopted Local Plan. The site is further constrained by a number of established trees on site.

The site is considered available as the existing use would not need to be relocated and the site is in one ownership.

The site is considered achievable as it is a greenfield site and there is a reasonable prospect that the site will be financially viable for residential development in the future.
