**Summary**

The site is a brown field site containing hardstanding. The site is a former military depot/airfield which is located to the east of Foston close to the A50. The site has potential access onto Uttoxeter Road. We have estimated a site capacity of 151 dwellings. There is medium developer interest on the site.

The site is considered to be potentially suitable as it is currently restricted by local planning policy as the site is in an area protected by countryside policy.

The site is considered available as the existing use would not need to be relocated and the site is in one ownership. The site has several Tree Preservation Orders which would require further assessment.

The site is considered achievable as there is a reasonable prospect that the site will be financially viable for residential development in the future. However, the impact of the pylons on viability would need further assessment.
