**Summary**

The site is a green field site that is currently used as grazing land that is located to the south of Lullington. The site has potential access onto Lullington Road. We have estimated a site capacity of 3 dwellings based on 10 dph. There is no developer interest on the site.

The site is considered to be potentially suitable as it is currently restricted by local planning policy as the site is in an area protected by countryside policy. This site would be served by sewerage works, discharge to the River Mease Special Area of Conservation. This river is failing its water quality objectives and this has the potential to be a significant constraint to residential development.

The site is considered not available as although the existing use would not need to be relocated, there has been no intention shown by either the landowner or a developer to develop the site.

The site is considered achievable as it is a green field site and there is a reasonable prospect that the site will be financially viable for residential development in the future.
