**Site suitable?** Potentially

**Site available?** Yes

**Site achievable?** Yes

**Deliverable dwellings:****Developable dwellings:****Summary**

The site is a green field site that is currently used as agricultural land. The site is located to the east of Melbourne. The site has potential access onto Station Road. A site capacity of 34 dwellings has been proposed. There is high developer interest on the site.

The site is considered to be potentially suitable as it is currently restricted by local planning policy as the site is in an area protected by countryside policy. A very small part of the site lies within Flood Zone 3a which would require a sequential test if development was to take occur on that part of the site.

The site is considered available as the existing use would not need to be relocated and the site is in one ownership.

The site is considered achievable as it is a green field site and there is a reasonable prospect that the site will be financially viable for residential development in the future.
