**Summary**

The site is a green field site that is currently used as agricultural land which also contains agricultural buildings. The site is located to the west of Milton. The site has potential access onto Main Street. We have estimated a site capacity of 22 dwellings. There is no developer interest on the site.

The site is considered to be potentially suitable as it is currently restricted by local planning policy as the site is in an area protected by countryside policy.

The site is considered not available as the existing use would need to be relocated. The site is in one ownership.

The site is considered achievable as it is a green field site and there is a reasonable prospect that the site will be financially viable for residential development in the future.
