Summary

The site is a green field site that is currently used as agricultural land that is located to the south of Castle Gresley. The site has potential access onto Oak Close. We have estimated a site capacity of 430 dwellings. There is no developer interest on the site.

The site is considered to be potentially suitable as it is currently restricted by local planning policy as the site is in an area protected by countryside policy. Part of the eastern boundary of the site is covered by a Tree Preservation Order which may require further assessment.

The site is considered not available as although the existing use would not need to be relocated, there has been no intention shown by either the landowner or a developer to develop the site.

The site is considered achievable as it is a green field site and there is a reasonable prospect that the site will be financially viable for residential development in the future.
