**Summary**

The site is a green field site that is currently agricultural grassland. The site is located to the south east of Overseal. The site has has potential access onto Moira Road. It has been proposed through the SHLAA submission that approximately 10 dwellings could be provided on this site. There is high developer interest on the site.

The site is considered to be potentially suitable as it is currently restricted by local planning policy as the site is in an area protected by countryside policy and has a public footpath through the site. This site would be served by sewerage works that discharge to the River Mease Special Area of Conservation. This river is failing its water quality objectives and this has the potential to be a significant constraint to residential development.

The site is considered available as the existing use would not need to be relocated and the site is in one ownership.

The site is considered achievable as it is a green field site and there is a reasonable prospect that the site will be financially viable for residential development in the future. Further assessment would be required on the public footpath through the site.
