**Summary**

The site is a green field site that is currently used as farmland. The site is located to the west of Chellaston. The site has potential access onto Lowes Lane. We have estimated a site capacity of 752 dwellings. There is high developer interest on the site.

The site is considered to be potentially suitable as it is currently restricted by local planning policy as the site is in an area protected by countryside policy. Further assessment would be required of the adjacent wildlife designation.

The site is considered available as the existing use would not need to be relocated and the site is in one ownership.

The site is considered achievable as it is a green field site and there is a reasonable prospect that the site will be financially viable for residential development in the future.
