Summary

The site is a green field site that is currently used as agricultural land with a slope to the west and south of the site. The site is located to the east of Repton. The site has potential access onto Milton Road. We have estimated a site capacity of 48 dwellings. There is no developer interest on the site.

The site is considered to be potentially suitable as it is currently restricted by local planning policy as the site is in an area protected by countryside policy.

The site is considered available as the existing use would not need to be relocated and the site is in one ownership.

The site is considered achievable as it is a green field site and there is a reasonable prospect that the site will be financially viable for residential development in the future. However, further assessment of the impact of the changing gradient on viability would be required.
