**Summary**

The site is predominantly greenfield, however contains two dwellings and is located to the west of Rosliston. The site has potential access onto Holden Croft, however access to the site would require the demolition of one if not both dwellings on the site. We have estimated a site capacity of 20 dwellings. There is no developer interest in the site.

The site is considered to be potentially suitable as it is currently restricted by local planning policy as the site is in an area protected by countryside policy.

The site is not considered available as the existing dwellings would require demolition and the site is in multiple ownership. However all parties are currently willing to develop the site for residential use.

The site is considered achievable as it is a predominantly greenfield site and there is a reasonable prospect that the site will be financially viable for residential development in the future.
