**Summary**

The site is a brown field site, has a former industrial use and is currently vacant.

The site is located within Swadlincote and has potential access onto Midland Road. We have estimated a site capacity of 34 dwellings. There is high developer interest on the site.

The site is considered to be potentially suitable as there is a possibility of ground contamination. Further assessment would be required on this and of the Tree Preservation Orders that border the southern boundary.

The site is considered available as the former use has moved, the site is vacant and is in single ownership.

The site is considered achievable, as there is a reasonable prospect that the site will be financially viable for residential development in the future. However, the possibility of ground contamination may impact on viability.
