**Summary**

The site is a green field site that is currently used as agricultural land that is located to the west of Swadlincote near the Cadley Hill Industrial Estate. The site has potential access onto Burton Road or Swadlincote Lane. The original SHLAA submission proposed 600 dwellings but part of that site now has permission for 215 dwellings which were started in 2014. This has reduced the suggested capacity to 385 dwellings. There is low developer interest on the site.

The site is considered to be potentially suitable as it is currently restricted by local planning policy as part of the site is covered by an employment allocation.

The site is considered available as the existing use would not need to be relocated and the site is in one ownership.

The site is considered achievable as it is a green field site and there is a reasonable prospect that the site will be financially viable for residential development in the future.
