Summary

The site is a greenfield site that is used for arable land, which is located to the immediate west of the A444 and the consented but not yet built mixed used Cadley Hill Site. The site has potential access onto Burton Road. It has been proposed through the SHLAA submission that approximately 700 dwellings could be provided on this site. There is high developer interest on the site.

The site is considered to be potentially suitable as the site is located within an area protected by countryside policy.

The site is considered available as the existing use would not need to be relocated. The site is in single ownership.

The site is considered achievable as it is a greenfield site and there is reasonable prospect that the site will be financially viable for residential development in the future.
