

## Climate Change Planning Guidance

**Suggested 'Check List of Climate Change Information' that may be provided to Support Submission of Planning Applications and may be included in 'local lists'**

### **Applications for development should include:**

- ☐ Design and access statements to include consideration of climate change issues, and how these have been addressed in the proposal
- ☐ Consideration of low carbon construction techniques and modern methods of construction
- ☐ Consideration of use of low carbon building materials
- ☐ Energy statements detailing consideration of energy saving/low carbon energy technologies and feasibility studies
- ☐ Method statements to identify how energy saving/carbon reduction targets are to be achieved and will be monitored on completion of the development
- ☐ Details of certification schemes and accreditations relevant to the installation of equipment or construction techniques, methods and materials incorporated which contribute to climate change mitigation or adaptation.
- ☐ Biodiversity conservation and enhancement measures
- ☐ Greenhouse gas reduction plan, for industrial and mineral developments, setting out the measures employed to reduce emissions of Greenhouse Gasses
