Team. She met Dawn Alan and Andrew at the police learning disability training and asked to attend the board to talk about being safe on the internet

Sarah gave advice about using the internet on a computer, laptop, phone or tablet

- ♦ Libraries are good at helping people use the internet
- ♦ Be careful how much information you put on social media profiles
- ♦ Set your social media to *private* so that only your friends can see your information and photos
- ♦ Do not share your passwords. Make them complicated but still easy to remember
- ♦ Do not tell people online where you are
- ♦ Only open emails from people you know, especially if it has attachments. They can give your computer a virus
- ♦ Be very careful if you meet a friend from online. Tell someone where you are going and who with. Not everyone is who they say they are
- ♦ Tell someone you trust if anyone makes you feel sad or worried or asks you for something that's makes you uncomfortable or money
