

## Derbyshire Highways Laboratory

DCC Highways Laboratory  
Ripley Road, Ambergate,  
Derbyshire, DE56 2ER  
Tel: 01629 532910

Derbyshire Highways Laboratory provides a materials consultancy, testing and site investigation service to the construction industry. Private developers, consulting engineers and public organisations are among the many clients taking advantage of these services.

The laboratory maintains an extensive range of modern testing facilities at its base in Ambergate and can carry out a range of tests on the following materials:

**Aggregates**

**Concrete**

**Bituminous**

**Engineering Soils**

The laboratory has the capability to offer onsite sampling for all the above materials and an onsite testing service which includes the following:

**Coring & Reinstatement**

**Plate Testing**

**Griptesting**

**Roadmarkings**

The laboratory operates independently within Derbyshire County Council and is accredited under the United Kingdom Accreditation Service (UKAS) quality system for many of its tests.

The laboratory is easily accessible from the M1, A38 & A6 being located on the A610 Ripley Road at Ambergate

For further information, assistance or advice contact the technical team at the highways laboratory.
