- Route 10: Short term measures
- Route 10: Med/Long term measures
- ..... Route 10: Subject to Landowner Discussions

The sections which have been assigned to each category are approximate and subject to change.

**Short-term Measures:**  
Relatively small scale schemes required to complete the link eg dropped kerb, route signs etc  
The links mostly use existing cycle routes, greenways and/or quiet residential roads.

**Med/Long-term Measures:**  
Larger infrastructure projects required to deliver the links eg resurfacing, toucan crossings, creation of shared-use routes etc

**Subject to Further Discussion:**  
Further discussions/investigations/agreement required.  
These links in particular may be subject to change in the future.
